

The versatile solution ...

FOR A WIDE RANGE OF AESTHETIC CONCERNS

3D Vjuve is an advanced Fractional CO₂ Laser offering Visual Rejuvenation facial and body treatments. The system can be used to treat a wide variety of aesthetic concerns including: fine lines and wrinkles, dyschromia, pigmented lesions, skin surface irregularities and scars.

The Visual Rejuvenation treatment can be used to improve pore size, texture and the appearance of the skin.

This device is not only used for facial treatments, CO₂ technology is well proven in the treatment of stretch marks and loose skin.

IN THE RAPIDLY EVOLVING MARKET OF VISUAL REJUVENATION, FRACTIONAL RESURFACING USING CO₂ LASER REMAINS THE GOLD STANDARD IN TREATMENT CHOICE IN TERMS OF SAFETY, PATIENT COMFORT AND EFFICACY.

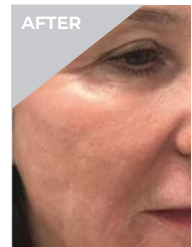

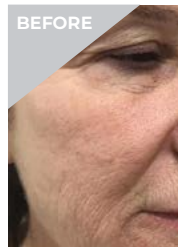

– DR KANNAN ATHREYA,
3D VJUVE BRAND AMBASSADOR

WHY 3D VJUVE?

The natural ageing process, together with exposure to the sun and pollution leads to a gradual deterioration of the skin's structure and function.

3D Visual Rejuvenation improves the thickness and hydration of the dermis and epidermis, resulting in a healthier, glowing, youthful appearance to the skin.

RESULTS AFTER JUST 3 TREATMENTS

TREATMENTS

30 MINS PER
TREATMENT

BENEFITS OF TREATMENT

- Total skin rejuvenation
- Minimal discomfort*
- Safe and fast
- Non-surgical
- Affordable alternative to surgery

* Anaesthetic cream is applied pre-treatment to numb the area.

FAQs

Am I a suitable candidate for this treatment?

Yes! As long as you are over the age of 18 and have no medical contra-indications*. This treatment will be best for treating lines, wrinkles, pitted skin, uneven skin tone, pigmentation and general skin resurfacing.

Is the treatment safe?

3D Vjuve is a safe and advanced treatment offering a minimally invasive procedure that embraces Co₂ technology.

How long does the treatment take?

Treatments last anywhere between 15 and 45 minutes depending on which treatment you have.

What will I feel during the treatment?

There is slight tingling sensation and warmth during the treatment, however, a numbing cream is applied to the

skin prior to treatment to reduce the sensation on the skin.

How will my skin react to the treatment?

During treatment the skin will be stimulated and will become slightly pink. A similar feeling to when you have been in the sun! The pinkness can last for up to 48 hours, depending on your skin sensitivity.

What results can I expect?

Results are noticeable from approximately two weeks following your treatment, after this your skin will become smoother, tighter, lines and wrinkles reduced and pores tightened. The treatment is progressive, so a course is recommended for best results.

How many treatments are recommended?

A course of three to five sessions are generally

recommended, which would consist of one treatment per month.

Is there any downtime following treatment?

There is no downtime with this treatment, however, your skin surface can become dry and slightly flaky as the new skin cells are stimulated in the deeper layers of the skin.

What aftercare is required?

Your therapists will recommend the appropriate skin care for you to use during your 3D Vjuve treatments, to hydrate and moisturise your skin. An SPF 30+ will need to be to be applied daily. Exfoliation treatments are not recommend for 4 weeks after a 3D Vjuve treatment.

* More advice on contra-indications will be provided during consultation.
